SUMMARY

AI/ML Engineer with hands-on experience building and prototyping AI-powered applications and intelligent workflows. Skilled in Python, SQL, Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG, Transformers, LangChain, LangGraph, and AI-driven automation. Experienced in translating ideas into functional solutions, collaborating across product and design teams, and using research, experimentation, and user feedback to validate AI concepts and deliver actionable technical solutions. Passionate about building practical AI systems and reducing uncertainty through evidence-based development.

SKILLS

- **Data Science & Analytics:** Python, NumPy, Pandas, EDA, Data Preprocessing, Data Visualization, Statistics.
- **AI & Machine Learning:** Machine Learning, Deep Learning, Computer Vision, NLP, Transformers, PyTorch, TensorFlow.
- **Generative & Agentic AI:** Generative AI, LLMs, RAG, LangChain, LangGraph, LangSmith, Hugging Face, Prompt Engineering, Fine-Tuning, AI Agents, Tool/Function Calling, Multi-Agent Systems, AI Automation, MCP, RAGAS.
- **SQL & Databases:** SQL, MySQL, PostgreSQL, MongoDB, Vector Databases (Pinecone, ChromaDB).
- **Backend & Web Development:** FastAPI, Flask, REST APIs, API Integration, HTML, CSS, JavaScript, React.js, Tailwind CSS, WordPress, Elementor, Mobile-First Development, UI/UX Design.
- **AI Tools & Platforms:** ChatGPT, Claude Code, Antigravity, Git, GitHub, Docker, CrewAI, AutoGen, n8n, Make.com, Zapier, Figma, Framer, Notion.
- **Product Management & Strategy:** Product Requirements Documents (PRDs), Roadmapping, User Research, Agile/Scrum, KPI Tracking, Market Research, Product Strategy.

EXPERIENCE

Margam – Study Abroad, Developer Intern, Jun 2025 – May 2026

- Prototyped an LLM-powered student assistant using Python, LLM APIs, RAG pipelines, and prompt engineering to automate student guidance workflows.
- Collaborated with product and design stakeholders to validate AI workflows, improve response quality through LLM experimentation, structured prompting, and user feedback, and identify process inefficiencies.
- Documented technical learnings and validated AI-driven solutions through rapid prototyping and workflow experimentation to support further development and transition toward production.

PROJECTS

Margam AI – LLM-Powered Student Assistant 2025

- Built an AI-powered student assistant for automating study-abroad guidance and delivering contextual responses to student queries.
- Designed structured prompts and workflows to improve response consistency and support personalized student interactions.
- Integrated LLM APIs and external data signals to enable context-aware guidance and validate the feasibility of AI-assisted counselling workflows.
- Tech Stack: Python, LangChain, LLM APIs, RAG Pipelines, Prompt Engineering.

Enterprise AI Intelligence & Automation Platform 2026

- Built an enterprise AI platform for intelligent insights, knowledge retrieval, and automated business workflows.
- Built an end-to-end enterprise AI platform integrating Data Analytics, SQL, Machine Learning, Deep Learning, NLP, Generative AI, RAG, and Agentic AI workflows.
- Implemented LLM-powered applications using Transformers, LangChain, LangGraph, LangSmith, Vector Databases, MCP, AI Agents, and FastAPI for intelligent automation and enterprise decision support.

EDUCATION

Vaagdevi College of Engineering - Warangal 2022 - 2026

B.Tech • Computer Science and Engineering (AI and ML) • CGPA - 8.15

Balaji Junior College - Warangal 2020 - 2022

Intermediate • MPC • CGPA - 8.62

ACHIEVEMENTS

- 2nd Prize Winner in a student community presentation challenge, where I represented Margam AI and presented its vision as an AI Pre-Counsellor for study-abroad aspirants.
- Mentored 2,000+ engineering students through academic guidance, technical education, and career-focused support.
